.....  
.....

11. To conclude, what general impression is created by this report ?

.....  
.....  
.....  
.....

. Summarize the factors that led the two witnesses to immigrate to Britain :  
economic and political reasons

- . These are examples of push factors because they're features of the home country which create pressure and cause people to move away
- . The opposite are called pull factors which attract people to another country
- . Here is a list of different factors leading to migration ; you'll have to make a table and sort all these factors into two columns : push and pull factors (you can add some other factors you find out yourself)

natural disaster  
unemployment  
fertile soils  
good wages  
high living standards  
freedom of speech  
harsh climate  
persecution  
lack of housing  
higher education  
good welfare services  
political asylum  
poverty  
discrimination  
overpopulation

- . As a conclusion, we may say there are many reasons for migration in Britain, and there're quite similar to other countries's ones
