

COMMENTARY – IUFM Franche-Comté

The meetings of the national teams participating in the MOBIDIC project (for example the meeting at Besançon in October 2003) enabled teachers and teacher trainers of various subject areas, as well as members of administrative staff to discuss “CLIL” intensively. As a result, the 2004/05 Curriculum (PLC2) for History and Geography at the IUFM de Franche-Comté will introduce a module on “European Classes”. It is planned to run seminars of nine lessons with German and French teacher trainers in History, Geography and Economics.

In this sense, one can already take stock of the MOBIDIC project: teacher training has been improved, teacher educators as well as teachers have started on a process of reflection, and bilingual teaching has been developed further.
